

Details of Sites Participating in EPA Voluntary Programs
(sectioned by EPA Program)

The New Jersey Department of Environmental Protection provides stewardship information in order to acknowledge and therefore encourage voluntary actions that result in a positive benefit to the environment.

Results as of 01/20/2012

Total number of Sites: 56

NOTES: (1) DATA - Regulated sites are surveyed about stewardship activities in 21 possible categories addressed in checklist questions numbered 3 to 23. Sites surveyed prior to the report date may not be listed here due to ongoing review related to site complexities. When review is complete a certificate will be issued to the site and it will be listed in the next published report. (2) SOURCE: The information in this report was recorded by enforcement personnel as part of compliance assurance activities. Ensuring compliance remains a primary function of DEP staff who collect the data. Compliance concerns do not automatically disqualify a site from receiving recognition for stewardship, but the Department reserves the right to exclude habitual or egregious violators. Full results of DEP compliance assurance activities including any non-compliance can be accessed through separate reports found here: http://datamine2.state.nj.us/dep/DEP_OPRA/EnfActivityDetails.htm

(3) DATA QUALITY/VALIDITY: Limitations on the investment of resources to verify and document stewardship means that the level of confidence in stewardship information is lower than that for compliance information which must support cases before a court of law. The Department may take under advisement input from third parties regarding the validity or accuracy of stewardship information at listed sites. Email concerns to stewardshipdata@dep.state.nj.us.

Messages should identify the report, site name and ID, and specific data elements in question as well as the basis for concern or disagreement. Site representatives with concerns about their own data should report these first to their inspector.

23) EPA VOLUNTARY PROGRAMS - Is the site participating in an EPA sponsored voluntary program? If yes, include the applicable EPA program(s).

Number of Sites : 56

Site ID	Site Name	Address	Acknowledged Date	Comments
14548	NJ ROWAN UNIVERSITY	201 MULLICA HILL RD, & ROWAN BLVD GLASSBORO, NJ 08028	8/23/2011	Energy Star and WasteWise.
14241	PSE&G GENERATING STATION	155 RAYMOND BLVD, NEWARK, NJ 07105	6/7/2011	
15880	TRANE CO	2231 E STATE ST, HAMILTON, NJ 08619	5/31/2011	DESCRIPTION BELOW.
14193	OWENS CORNING KEARNY PLANT	1249 NEWARK TPKE, KEARNY, NJ 07032	5/4/2011	Owens Corning on a corporate level is involved with Smartway Transport Partnership.
27805	EPIC INDUSTRIES INC	1007 JERSEY AVE, NEW BRUNSWICK, NJ 08901	4/15/2011

15880	TRANE CO	2231 E STATE ST, HAMILTON, NJ 08619	5/31/2011	ACTIVITY #23) USEPA VOLUNTARY PROGRAMS: MEMBER OF U.S. EPA SMARTWAY PROGRAM: ACCEPTABLE. Trane Corp., as a division of Ingersoll Rand Co. Ltd. is a member of the U.S. EPA SmartWay program, which represents a voluntary commitment between the shipper (Ingersoll Rand) and their SmartWay Transport Carriers to improve air quality and reduce fuel consumption. Carriers are required to report their SmartWay membership status and FLEET (Freight Logistics Environmental and Energy Tracking) score (an EPA measure of logistics efficiency), and commit to improve their environmental scores over a period of three years. SmartWay shipper strategies include No-Idling policies at loading docks, & evaluating and modifying business practices at distribution centers and warehouses, including optimal shipping mode logistics (truck, rail, air) to attain fewer shipments, fewer vehicles used, reduced fuel consumption, and reduced emissions of greenhouse gases. Appointment scheduling can also be provided to carriers at congested facilities to facilitate faster loading/unloading: This also reduces greenhouse gas emissions and reduces the subsequent fuel consumption from unnecessary truck idling. http://www.epa.gov/smartway/transport/partner-list/index.htm#
14193	OWENS CORNING KEARNY PLANT	1249 NEWARK TPKE, KEARNY, NJ 07032	5/4/2011	Owens Corning on a corporate level is involved with Smartway Transport Partnership.

Details of Sites Participating in EPA Voluntary Programs
(sectioned by county; municipality)

The New Jersey Department of Environmental Protection provides stewardship information in order to acknowledge and therefore encourage voluntary actions that result in a positive benefit to the environment.

Results as of 01/20/2012

Total number of Sites: 56

NOTES: (1) DATA - Regulated sites are surveyed about stewardship activities in 21 possible categories addressed in checklist questions numbered 3 to 23. Sites surveyed prior to the report date may not be listed here due to ongoing review related to site complexities. When review is complete a certificate will be issued to the site and it will be listed in the next published report. (2) SOURCE: The information in this report was recorded by enforcement personnel as part of compliance assurance activities. Ensuring compliance remains a primary function of DEP staff who collect the data. Compliance concerns do not automatically disqualify a site from receiving recognition for stewardship, but the Department reserves the right to exclude habitual or egregious violators. Full results of DEP compliance assurance activities including any non-compliance can be accessed through separate reports found here: http://datamine2.state.nj.us/dep/DEP_OPRA/EnfActivityDetails.htm

(3) DATA QUALITY/VALIDITY: Limitations on the investment of resources to verify and document stewardship means that the level of confidence in stewardship information is lower than that for compliance information which must support cases before a court of law. The Department may take under advisement input from third parties regarding the validity or accuracy of stewardship information at listed sites. Email concerns to stewardshipdata@dep.state.nj.us.

Messages should identify the report, site name and ID, and specific data elements in question as well as the basis for concern or disagreement. Site representatives with concerns about their own data should report these first to their inspector.

15880	TRANE CO	2231 E STATE ST, HAMILTON, NJ 08619	5/31/2011	SmartWay Transport Partnership.	ACTIVITY #23) USEPA VOLUNTARY PROGRAMS: MEMBER OF U.S. EPA SMARTWAY PROGRAM: ACCEPTABLE. Trane Corp., as a division of Ingersoll Rand Co. Ltd. is a member of the U.S. EPA SmartWay program, which represents a voluntary commitment between the shipper (Ingersoll Rand) and their SmartWay Transport Carriers to improve air quality and reduce fuel consumption. Carriers are required to report their SmartWay membership status and FLEET (Freight Logistics Environmental and Energy Tracking) score (an EPA measure of logistics efficiency), and commit to improve their environmental scores over a period of three years. SmartWay shipper strategies include No-Idling policies at loading docks, & evaluating and modifying business practices at distribution centers and warehouses, including optimal shipping mode logistics (truck, rail, air) to attain fewer shipments, fewer vehicles used, reduced fuel consumption, and reduced emissions of greenhouse gases. Appointment scheduling can also be provided to carriers at congested facilities to facilitate faster loading/unloading: This also reduces greenhouse gas emissions and reduces the subsequent fuel consumption from unnecessary truck idling. http://www.epa.gov/smartway/transport/partner-list/index.htm#

Details of Sites Participating in EPA Voluntary Programs

(sectioned by site name)

The New Jersey Department of Environmental Protection provides stewardship information in order to acknowledge and therefore encourage voluntary actions that result in a positive benefit to the environment.

Results as of 01/20/2012

Total number of Sites: 56

NOTES: (1) DATA - Regulated sites are surveyed about stewardship activities in 21 possible categories addressed in checklist questions numbered 3 to 23. Sites surveyed prior to the report date may not be listed here due to ongoing review related to site complexities. When review is complete a certificate will be issued to the site and it will be listed in the next published report. (2) SOURCE: The information in this report was recorded by enforcement personnel as part of compliance assurance activities. Ensuring compliance remains a primary function of DEP staff who collect the data. Compliance concerns do not automatically disqualify a site from receiving recognition for stewardship, but the Department reserves the right to exclude habitual or egregious violators. Full results of DEP compliance assurance activities including any non-compliance can be accessed through separate reports found here:

http://datamine2.state.nj.us/dep/DEP_OPRA/EnfActivityDetails.htm

(3) DATA QUALITY/VALIDITY: Limitations on the investment of resources to verify and document stewardship means that the level of confidence in stewardship information is lower than that for compliance information which must support cases before a court of law. The Department may take under advisement input from third parties regarding the validity or accuracy of stewardship information at listed sites. Email concerns to

stewardshipdata@dep.state.nj.us.

Messages should identify the report, site name and ID, and specific data elements in question as well as the basis for concern or disagreement. Site representatives with concerns about their own data should report these first to their inspector.

101 HUDSON STREET OFFICE BUILDING

Site ID: 7250 101 HUDSON ST,
Jersey City, NJ 07302

Acknowledged Date	EPA Program	Comments

6/22/2010	23) EPA VOLUNTARY PROGRAMS - Is the site participating in an EPA sponsored voluntary program? If yes, include the applicable EPA program(s).	See below the 3 EPA Programs PSE&G Linden are involved in.
6/22/2010	Climate Leaders.	PSEG Linden has been a member of the USEPA Climate Leaders program. Participating companies commit to reduce their impact on the global environment by completing a corporate-wide inventory of their greenhouse gas emissions based on a quality management system, setting aggressive reduction goals, and annually reporting their progress to EPA. http://www.epa.gov/climateleadters/partners/partners/publicserviceenterprisegroup.htm
6/22/2010	National Partnership for Environmental Priorities.	PSEG Linden is a member of the National Partnership for Environmental Priorities (NPEP) focused on reducing the use of potentially hazardous chemicals from products and processes, http://www.epa.gov/osw/partnerships/npep/partners.htm#P
6/22/2010	WasteWise.	PSE&G Linden is an active Participant and a charter member of the EPA WasteWise Hall of Fame since 1993. PSEG Linden is also a WasteWise Hall of Fame Company, among the first companies accorded that honor in 2003. All recycling and waste prevention activities from the site are rolled up into a corporate report, which is provided to the US EPA annually, PSEG was one of the first utilities in the WasteWise program and has serve to mentor and promote the WasteWise waste prevention and recycling message to other members of their industry. http://www.epa.gov/epawaste/partnerships/wastewise/pubs/utilifact.pdf PSE&G Linden also participates in the NJDEP WasteWise Program and was co-chair of the program during the years 2007 to 2009.

5/31/2011	23) EPA VOLUNTARY PROGRAMS - Is the site participating in an EPA sponsored voluntary program? If yes, include the applicable EPA program(s).	DESCRIPTION BELOW.
5/31/2011	SmartWay Transport Partnership.	ACTIVITY #23) USEPA VOLUNTARY PROGRAMS: MEMBER OF U.S. EPA SMARTWAY PROGRAM: ACCEPTABLE. Trane Corp., as a division of Ingersoll Rand Co. Ltd. is a member of the U.S. EPA SmartWay program, which represents a voluntary commitment between the shipper (Ingersoll Rand) and their SmartWay Transport Carriers to improve air quality and reduce fuel consumption. Carriers are required to report their SmartWay membership status and FLEET (Freight Logistics Environmental and Energy Tracking) score (an EPA measure of logistics efficiency), and commit to improve their environmental scores over a period of three years. SmartWay shipper strategies include No-Idling policies at loading docks, & evaluating and modifying business practices at distribution centers and warehouses, including optimal shipping mode logistics (truck, rail, air) to attain fewer shipments, fewer vehicles used, reduced fuel consumption, and reduced emissions of greenhouse gases. Appointment scheduling can also be provided to carriers at congested facilities to facilitate faster loading/unloading: This also reduces greenhouse gas emissions and reduces the subsequent fuel consumption from unnecessary truck idling. http://www.epa.gov/smartway/transport/partner-list/index.htm#
