

Summary of Sites Participating in Stewardship
(sorted by Category count)

The New Jersey Department of Environmental Protection provides stewardship information in order to acknowledge and therefore encourage voluntary actions that result in a positive benefit to the environment.

Results as of 05/15/2012

Number of Sites: 624

NOTES: (1) DATA - Regulated sites are surveyed about stewardship activities in 21 possible categories addressed in checklist questions numbered 3 to 23. Sites surveyed prior to the report date may not be listed here due to ongoing review related to site complexities. When review is complete a certificate will be issued to the site and it will be listed in the next published report. (2) SOURCE: The information in this report was recorded by enforcement personnel as part of compliance assurance activities. Ensuring compliance remains a primary function of DEP staff who collect the data. Compliance concerns do not automatically disqualify a site from receiving recognition for stewardship, but the Department reserves the right to exclude habitual or egregious violators. Full results of DEP compliance assurance activities including any non-compliance can be accessed through separate reports found here: http://datamine2.state.nj.us/dep/DEP_OPRA/EnfActivityDetails.htm
(3) DATA QUALITY/VALIDITY: Limitations on the investment of resources to verify and document stewardship means that the level of confidence in stewardship information is lower than that for compliance information which must support cases before a court of law. The Department may take under advisement input from third parties regarding the validity or accuracy of stewardship information at listed sites. Email concerns to stewardshipdata@dep.state.nj.us. Messages should identify the report, site name and ID, and specific data elements in question as well as the basis for concern or disagreement. Site representatives with concerns about their own data should report these first to their inspector.
